Sustainable Utilization of Forest Resources and Ecological Sciences in Japanese Mountains

Jointly organized by UiT the Arctic University of Norway, University of Toyama, and NIHU Transdisciplinary Project for Northeast Asia

Date & Time: 9:00-3:10, June 11, 2018

Venue: C104, Faculty of Science Building, University of Toyama

PROGRAM

Chair: Naoya Wada (CFES, University of Toyama)

9:00 - 9:05

Opening remarks

9:05 - 9:20

Naoya Wada (CFES, University of Toyama)

"Introduction of ecological research in Toyama:

Diverse ecosystems with 4,000m altitudinal gradient from ocean to alpine"

9:20 - 9:50

Kazuto Sazawa (Fac. of Sci., University of Toyama)

"Effect of planted forest on the quality of stream water in forest watersheds of Toyama, Japan"

9:50 - 10:20

Tamihisa Ohta (Fac. of Sci., University of Toyama)

"Effects of differences in vegetation on calcium dynamics and invertebrate communities"

10:20 - 10:40

Break

Chair: Jun Ma (CFES, University of Toyama)

10:40 - 11:10

Kazunobu Ikeya (National Museum of Ethnology)

"Sustainable utilization of Non Timber Products in Japan"

11:10 - 11:40

Masashi Yamamoto (CFES, University of Toyama)

"Sustainable utilization of forest resources from the viewpoint of economic theory"

11:40 - 1:00

Lunch

Chair: Elisabeth J. Cooper (UiT Arctic University of Norway)

1:00 - 3:00

Group discussion by Norwegian and Japanese students

3:00 - 3:10

Concluding and closing remarks
